

MOTHER! There is no word so full of meaning and about which such tender and holy recollections cluster as that of "Mother."—she who watched over our helpless infancy and guided our first tottering steps. Yet the life of every Expectant Mother is beset with danger and all effort should be made to avoid it, so assists nature in its unchangeable place that the Expectant Mother is enabled to look forward without dread, suffering or gloomy forebodings, to the hour when she experiences the joy of Motherhood. Its use insures safety to the lives of both Mother and Child, and she is found stronger after than before confinement—in short, it "makes Childbirth natural and easy," as so many have said. Don't be persuaded to use anything but

MOTHER'S FRIEND

"My wife suffered more in ten minutes with either of her other two children than she did altogether with her last, having previously used four bottles of 'Mother's Friend.' It is a blessing to any one expecting to become a MOTHER," says a customer, HANNAHSON DALE, Carroll, Illinois.

"The worst cold I ever had in my life was cured by Chamberlain's Cough Remedy," writes W. H. Norton, of South Creek, Cal. "This cold left me with a cough and I was expectorating all the time. The remedy cured me and I want all of my friends who troubled with a cough or cold to use it for it will do them good." Sold by A. M. Hughes.

The three year old boy of J. A. Johnson of Lynn Center, Ill., is subject to attacks of croup. Mr. Johnson says he is satisfied that the timely use of Chamberlain's Cough Remedy during a serious attack saved his boy's life. He is in the drug business, a member of the firm of the Johnsons of that place and they handle a great many patent medicines for throat and lung disease. He had all these to choose from and skilled physicians ready to respond to his call but selected this remedy for use in his family at a time when his child's life was in danger because he knew it to be superior to any other and famous the country over for its cures of croup. Mr. Johnson says this is the best selling medicine they and that it gives splendid satisfaction in all cases. Sold by A. M. Hughes.

SHOOTING AFFRAY

In Which Henry Sullivan Was Wounded.

Just as the News was going to press on Thursday evening of last week, our town was thrown into a fever of excitement by the sharp report of three pistol shots fired in rapid succession.

Investigation, soon proved that the combatants were Frank H. Yates and Henry C. Sullivan, and that one of the balls had taken effect in the body of the latter.

The fight occurred in front of Spencer & Crutcher's grocery store, where Frank had been standing for a short time before. It seems that Henry came along and struck at Frank with his fist, and that they immediately clinched. Frank drew a revolver, and after struggling until they got into the street, the firing was done. It is thought the first shot took effect. After three shots had been fired the two men were pulled apart and Henry went to his office, while Frank was placed under arrest.

Physicians were summoned and they found that the bullet had entered the left side of the abdomen. The course of the ball could not be ascertained, but it was believed to have missed the vital parts and the wound was thought to be not dangerous. A few hours later, however, he began to suffer severely and his condition continued to grow so much worse that his recovery was almost despaired of. It was not until Tuesday that a very decided change for the better took place. Since that time he has steadily improved and is now out of danger.

The two men are brothers-in-law and their trouble is the result of a family difficulty extending over a few months. On the forenoon of the day of the shooting Mr. Sullivan went to the house occupied by Mr. Yates, where her father, Mr. A. P. Borders, was packing some household goods preparatory to moving to his farm. While there she and Yates had some trouble. Mr. Sullivan was at Ashland, but came home in the evening and heard of the difficulty. This led to the attack referred to above.

The unfortunate affair is regretted by everybody, and all are glad that the results are not so serious as promised a few days ago.

FOR BIG SANDY.

Recommendations of United States Engineers.

The report of the United States Engineers which will go to the next session of Congress has recently been made public.

It recommends the appropriation of \$5,000 for the removal of snags and other obstructions from the Big Sandy river, apportioned as follows: \$1500 for Levisa fork, the same amount for the Tug fork, and \$2000 for the main river. It has been five years since the main river has had an appropriation for this purpose.

Also an appropriation for \$10,000 is urged for building a dike at the mouth of Georges creek.

Surveyors for dikes or other necessary improvements are recommended to be made at Middle Creek and Buffalo.

The dike at Georges creek is badly needed, and if put in, it will remedy the worst place in the river. The banks have broken on both sides until the river is two or three times as wide as formerly, and correspondingly shallow. Steamboats have been unable to pass that point when there was fourteen feet of water in the river. These appropriations are certain to be made by Congress.

BADLY INJURED.

V. B. Dawson, of Ashland, better known as "Bud," was severely injured at White House Monday.

He is an extra brakeman on the Big Sandy division of the C. & O., and was employed in place of W. S. Land, who was so badly hurt a few weeks ago. At the time and place mentioned Dawson was helping make up the train. He was on a box car and was about to make a coupling when seeing he was going to fall, he jumped, his right ankle striking a tie. He was hastily picked up, when it was found that the outer ankle bone was broken. His right wrist was also sprained and his whole body badly shaken up. Dawson was brought to Louisa where his injuries were attended to by the company's physician, Dr. Wroton, and by whom he was taken to his home.

ONLY ONE VOTE

Decides Two Important Races in Lawrence County.

The value of one vote in a general election has seldom been as forcibly shown as it was in the recent election in Lawrence county.

A total vote of 3973 was cast, and in the races for County Clerk and Jailor the canvassing board decided that the Republican candidates were elected by one vote. It was thought the result was a tie, but the canvassing board ruled out a Democratic ballot on a technicality, leaving the Republican candidate one ahead.

This is a remarkable result considering the large number of votes cast.

REPORT UNTRUE.

N. & W. Will Not Build Down Sandy Soon.

We regret that the truth compels us to spoil the following welcome story, but we have seen a letter from the Chief Engineer of the Norfolk & Western railroad which says the company has nothing to do with any survey being made down Tug and Sandy rivers.

Williamson West Virginian:— "A number of N. & W. officials have been here this week and they say there is no doubt but that this road will be commenced inside of ninety days and rapidly pushed through. The road will be built for more reasons than one. The chief object, however, is to avoid the delay and expense incident to getting heavy freight trains over the Dingess hill. The section of the road from Nantux to Kenova costs the company more than and other stretch of road in the entire system of the same number of miles. Besides this, the new road will open up a country, rich in oil, gas and coal, which of itself will eventually pay back the expense of building the road. It will give our country a temporary boom. We certainly need it and will welcome the beginning of the enterprise.

Why Attempt to Cure

Cataract by the use of so-called blood remedies? That cataract is not caused by blood troubles is self-evident when you reflect that attacks are always due to sudden climatic changes or exposure, and occur most frequently during the winter and spring, though the blood is as pure then as in summer or fall. A remedy which quickly relieves and cures the cataract attacks has been found in Ely's Cream Balm.

A man named McQuary, from Arkansas, was here Wednesday, and claimed to be making his way around the world to win a bride and \$5,000. He rode a horse and was accompanied by two gray hounds. He was dressed in the costume of a Cavalier. His story says the eccentric father of his prospective bride requires that he shall make his way around the world, having started without a cent. Also, that he shall take the dogs with him the entire trip. If he loses one of the dogs he forfeits \$1,000 of the \$5,000, and should he lose both dogs he forfeits \$2,000. If he gets home within the required time, with both dogs, he is to receive \$5,000 and his sweetheart.

The story is so romantic enough to suit the most fastidious, and may be taken for what it is worth by our readers. McQuary went up Sandy from here, claiming to be bound for Charleston, S. C., from where he will go to Cuba.

Council Proceedings.

At last Tuesday night's meeting the City Council decided to bring suit against all ex-Marshals and the present Marshal at next meeting, unless a settlement in full of all taxes in their hands shall have been made by that time.

Orders were also made to put in stone crossings on Main street between Stewart's and Gonnells, and from Hughes to Roffes; also, from Mrs. Swetnam's to the old depot.

All the flag-stones lying along the railroad track near the depot was purchased for about \$600, and an order made to use it for crossings at the corner of Main and Main Cross streets—from Hawkworth's to Gonnells' and from there to Sullivan & Kise's. The old stone in those crossings will be used for making repairs wherever needed in town.

A horrible murder was committed at Vanceburg recently. Capt. Hoobler, a prominent contractor, was called to his door and struck in the face with a bottle of vitrol. The fiend who did it then poured a quantity of the acid down the prostrate man's throat. After twenty-four hours of awful agony, Hoobler died. The murderer was disguised, but is believed to have been a young man named H. T. Halbert, a former partner of Hoobler's. Halbert is a civil engineer and chemist. Every effort has been made to find him, but without success.
